FROM:

Myra Knicker

DATE

7/29/88

TIME

2:20 PM

SUBJECT

M² Ginnis sludge disposal lagoon

SUMMARY OF COMMUNICATION

I called Dr. Parker & told him that Mr. Layton had been briefed on his concerns & had asked me to return his call.

I told him we were going to be gathering info. on what was being discharged & then we would propose a new NPDES permit that would contain add'l parameters (based on add'l info we would receive).

I also told him we were going to investigate ~~the~~ his concern that seepage was occurring thru the dikes into the intercoastal water way.

Dr. Parker asked to accompany our inspectors. I told him I didn't know when they would go.

CONCLUSIONS, ACTION TAKEN OR REQUIRED

- 1. 6W-P - re-issue permit - work w/ 6W-E re: data collected
2. 6W-E - Attend A.O. re: reporting
- B. Decide on enf. action(s), if any
- C. Work w/ 6E to determine if seepage is occurring and what's in the discharge.
